

Research project management in Open Science Framework

April 19, 2021
Shannon Sheridan, MLIS

OSF is a free, open source web application that connects and supports the research workflow, enabling scientists to increase the efficiency and effectiveness of their research. Researchers use OSF to collaborate, document, archive, share, and register research projects, materials, and data.

Using the OSF as a researcher

1. Store your work
2. Collaborate with your colleagues
3. Make your work citable
4. Measure your impact
